

# EasyFlow SMART

## Mandatory parts for usage

### 1) Duct Gasket Kit

You can choose kits for duct sizes between 8-40 mm.

*One duct gasket kit is included in the purchase.*

### 2) Cable Gasket Kit

You can choose kits for fiber sizes between 4-16 mm.

*One cable gasket kit is included in the purchase.*

### 3) Sponges for duct cleaning

Clean duct with sponges before installing cable.

### 4) Lubrication

We recommend FlowLUB 5000 for micro cable from 4.0-16 mm.

*Utilization of lubrication during fiber blowing increases blowing distance by a factor of 2-3.*

### 5) Blowing tips

We recommend using blowing tips

*It ensures the fiber/cable does not get stuck close to a duct connector, and provides more weight to small fibers making it easier to blow.*

### 6) Midi Drum rack

We recommend a drum rack for easy, safe roll out of fiber.

If you are in need of competent feedback on your fiber blowing project, do not hesitate to contact us.
